

## **River Campsites in the Colorado River Corridor: Lees Ferry to Diamond Creek**

*Updated October 2007*

This list represents presently known, typically utilized river campsites in the Colorado River corridor from Lees Ferry to Diamond Creek. It is intended for use as a reference only and should not necessarily be considered comprehensive, particularly for very small groups. Despite controlled flows from Glen Canyon Dam, the Colorado River remains a dynamic environment and a number of factors can cause campsites to change rapidly. It is likely that as a result of the High Flow Event in March 2008 some campsites will have increased or decreased in size; furthermore it is possible that new sandbars ideal for camping were formed.

Campsite size is a subjective and approximate measurement. The National Park Service is working to provide the best campsite information possible; this information will continue to be updated as campsite mapping work is completed. Campsite size also varies according to river level, so use your best judgment when choosing campsites appropriate for your group size.

Current approximate campsite classifications are as follows:

- 1) Very Small: 0-6 people
- 2) Small: 7-12 people
- 3) Medium: 13-18 people
- 4) Large: 19-24+ people
